# Display Art "Complete *tattoo*WALL® Range"

Innovators in surface design and coverings, TATTOOWALL supply the digital print industry with unique digital frescos, widening the production range of digital print. The prohibitive specifications of traditional wall and floor coverings are now in the past! TATTOOWALL and TATTOOFLOOR substrates combine design and practicality for surfaces of any size.

## Increasing the scope of production

For digital printing professionals, TATTOOWALL digital murals will widen the boundaries of your business. The TATTOOWALL digital murals product is a real opportunity to increase your production range. If you own a solvent printing machine (eco solvent, light solvent) or HP Latex, you will be able to manage the entire TATTOOWALL production process.

TATTOOWALL digital murals is a new substrate offering a new digital decorating technique. It enables any kind of wall surface to be decorated by transferring digital inks from the TATTOOWALL paper substrate, directly onto the wall surface.

This innovative substrate allows for decoration of many different kinds of surfaces and is a particularly good solution to decorate plaster walls, raw cement and bricks. TATTOOWALL digital murals is so versatile, it can be used on surfaces of any shape and dimension including flat or curved walls, ceilings, arches, domes, corners, edges and irregular surfaces with textures of up to 7-8mm.

Decorate indoor and outdoor, smooth or rough surfaces of any dimension to create the effect of a real fresco.

## Tradition meets technology

TATTOOWALL digital murals is a patented technique created for the production of direct and lasting transfers of elaborate and complicated digital images from the computer onto a surface.

Traditional decorating techniques such as wallpapering have limitations regarding the surface preparation and the surface on which traditional wallpapers can be applied to. TATTOOWALL digital murals is the direct transfer of colour onto a desired surface. A fresco effect is created without the need for any preliminary wall treatment in order to fix the colour.

With the TATTOOWALL digital murals product, digital printers can now offer a valid and patented decorating solution for all surfaces including difficult ones.

## Where can TATTOOWALL be applied?

The TATTOOWALL substrate and method is being widely adopted by architects and designers alike due to its unlimited uses. The creative possibilities for TATTOOWALL digital murals are only limited by the imagination. Restaurants, museums, shopping centres, entertainment settings, shops, hospitals, offices, gardens, courtyards and indeed personal settings such as home interiors and yachts, are all areas in which TATTOOWALL digital murals can be used.

More recently TATTOOWALL has been adopted as a valid technique in the world of restoration, being the only available method to perfectly reproduce the original damaged fresco.

# Display Art "Complete META Range"

A FEW DESIGNS THOUSANDS TO CHOOSE FROM.

Our exclusive aluminum composite material made of two primed sheets of aluminum with a solid polyethylene core. The polyethylene is made of recycled tires, which contributes to a less material intensive and lighter product. The coated sheets create a durable finished art piece that is ideal for outdoor applications such as pool areas, cabanas, spas and other exposed common areas.
